## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I and Species 1 in the replies filed on 03/09/06, 04/05/06 and 04/20/06 is acknowledged.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

3. The information disclosure statements (IDS) submitted on 07/31/03, 03/03/04 and 09/23/04 were considered by the examiner.

### ***Drawings***

4. The drawings were received on 07/31/03. These drawings are acceptable.

### ***Specification***

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1745

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. Claim 1 recites the limitation "a material" in lines 4 (two occurrences). There is insufficient antecedent basis for this limitation in the claim. It is unclear whether applicant intends to recite the same material or different material.

9. Claim 2 recites the limitation "a material" in lines 4 and 5 (two occurrences). There is insufficient antecedent basis for this limitation in the claim. Since claim 1 recites the term "a material" twice, it is further unclear whether applicant intends to recite same or additional different materials.

#### ***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

#### ***Claim Rejections - 35 USC § 103***

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1745

12. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

13. Claims 1-2 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the European publication EP 1098380 (hereinafter referred to as the EP'380).

The present claims are directed to a separator wherein the disclosed inventive concept comprises the specific separator comprising materials which are made different.

As to claim 1:

The EP'380 reveals a gas separator for fuel cells obtained as a laminate of unit cells (ABSTRACT). Disclosed is that gas separator 30 has a base plate unit 60 that is obtained by bonding two base plates 62 and 64 molded to have predetermined shapes (ABSTRACT). The separator is combined with adjoining members to define either a flow path of a gaseous fuel or a flow path of an oxidizing gas, and separates a flow of gaseous fuel from a flow of oxidizing gas (P.0001, 0003). *Thus, the separator of the EP'380 faces the fuel cell anode at one side and the fuel cell cathode at the other side.*

Examiner's note: it is noted that the instant claims are being construed as product-by-process claims (i.e. the limitation reciting that the two materials "are made different" and "the

Art Unit: 1745

*bonding" itself) and that the product itself does not depend on the process of making it.*

*Accordingly, in a product-by-process claim, the patentability of a product does not depend on its method of production. In that, it is further noted that the product in the instant claims is the same as or obvious over the product of the prior art.*

As to claim 2:

Disclosed is that the gas separator 30 has a base plate unit 60 that is obtained by bonding two base plates 62 and 64 molded to have predetermined shapes (ABSTRACT).

Therefore, the instant claims are anticipated by the EP'380. However, if the claims are not anticipated the claims are obvious as it has been held similar products claimed in product-by-process limitations are obvious In re Brown 173 USPQ 685 and In re Fessman 180 USPQ 324
